

Supplementary Material 3: Register Profiles for 60 languages

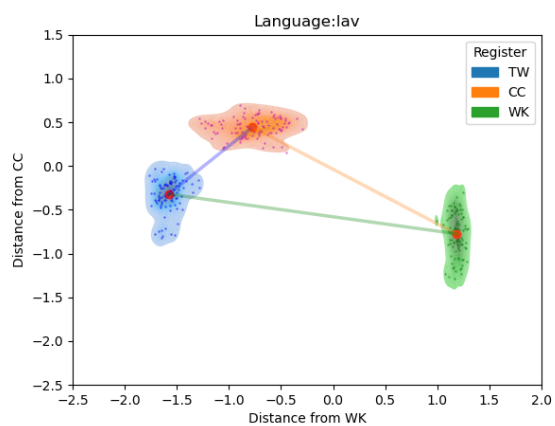

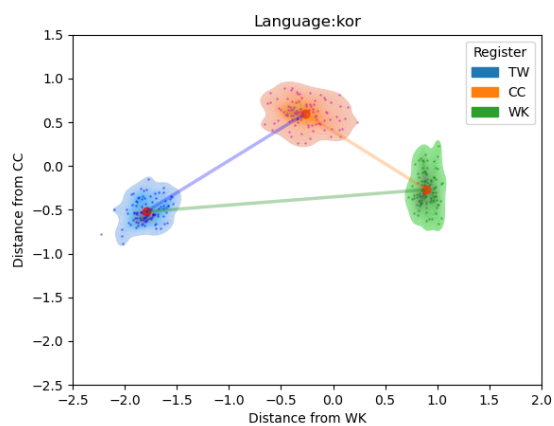

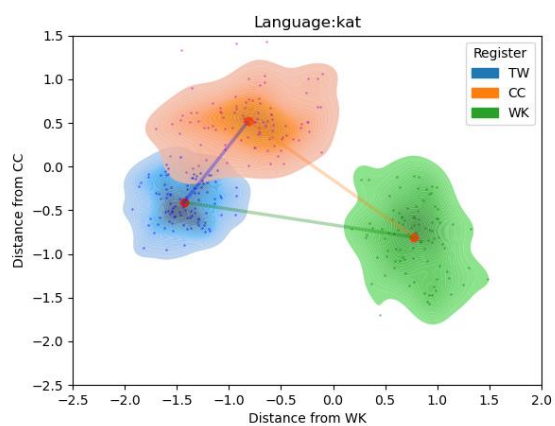

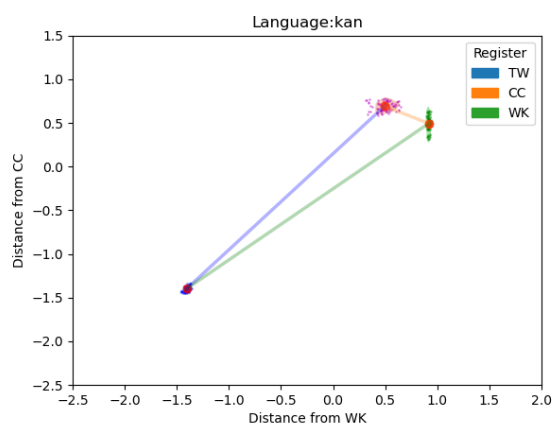

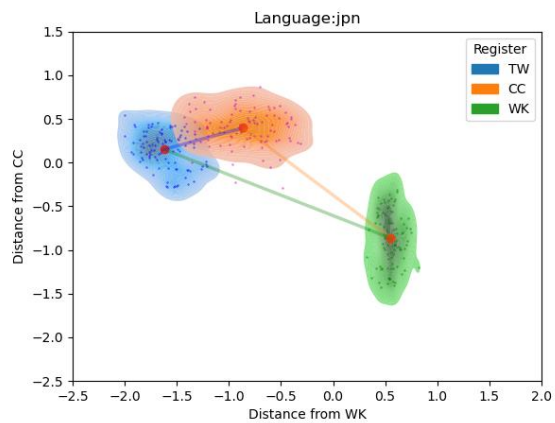

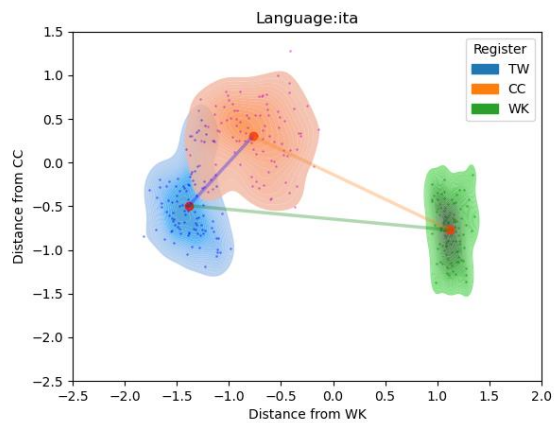

Corresponding to Figure 7 in the paper, where the similarity network for 6 languages are shown. The similarity network figures for 60 languages are given in this document.

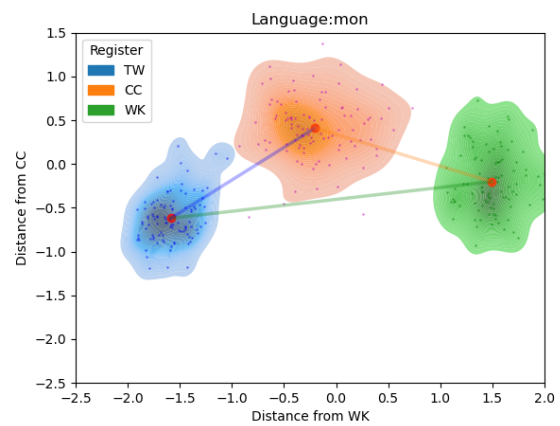

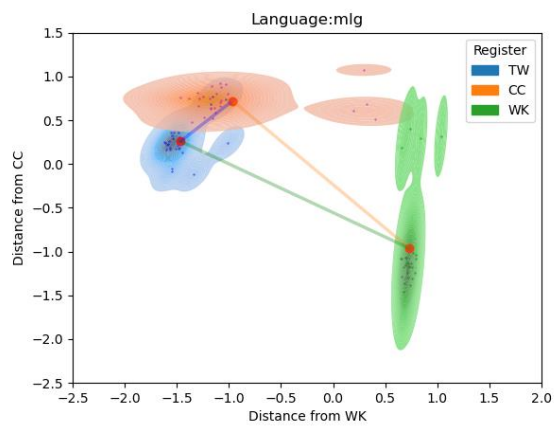

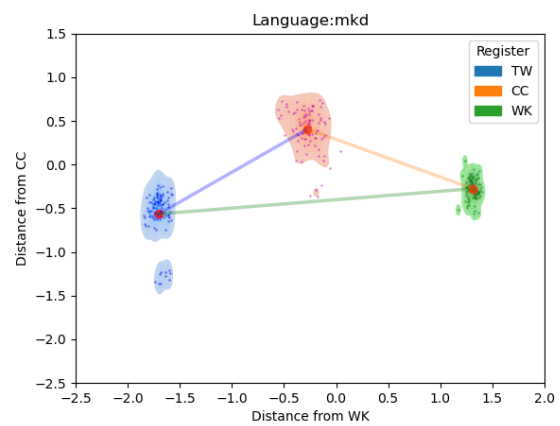

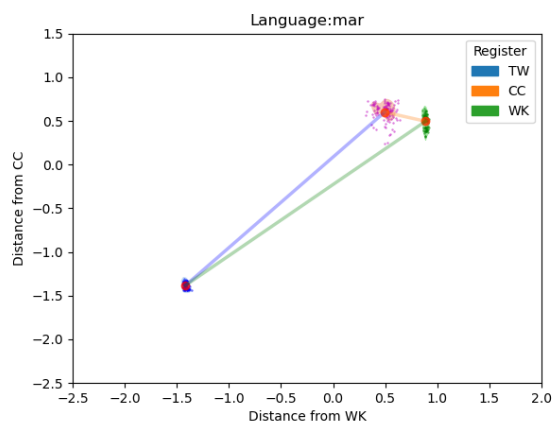

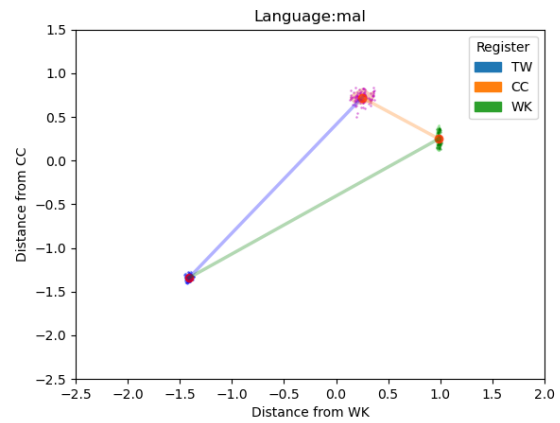

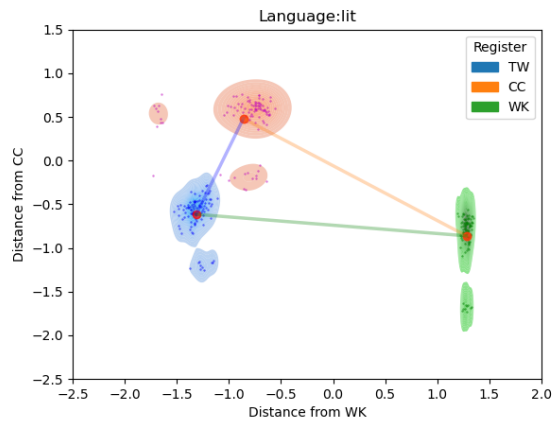

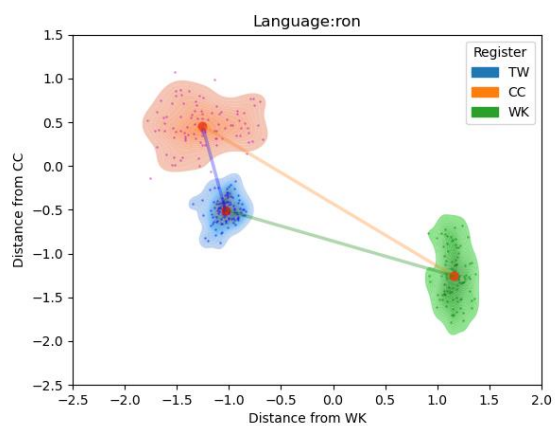

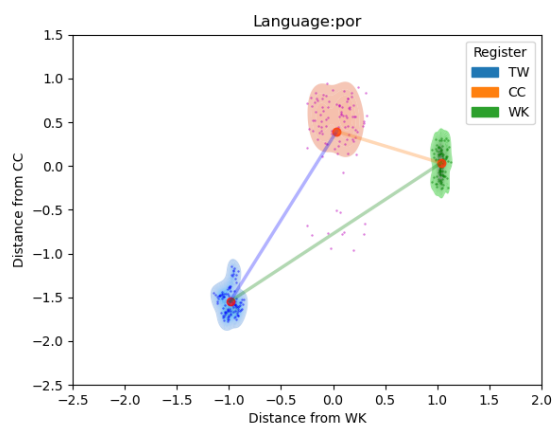

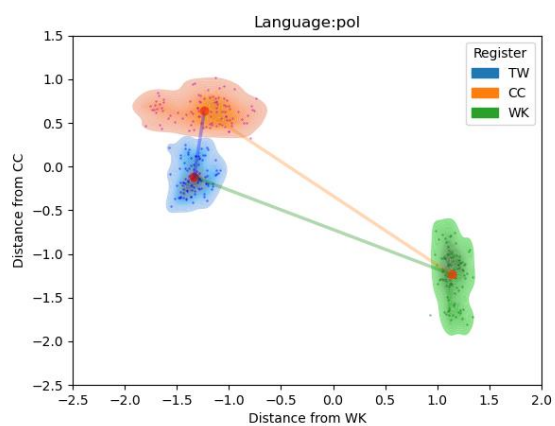

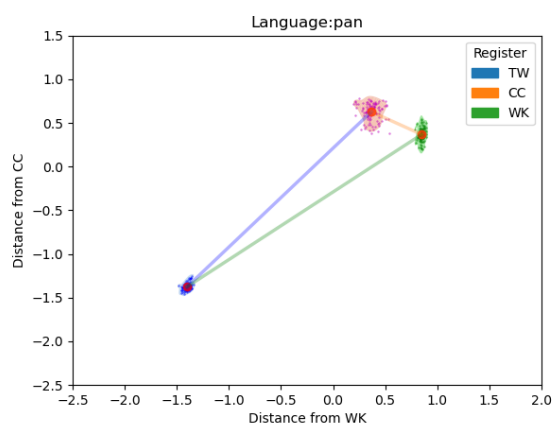

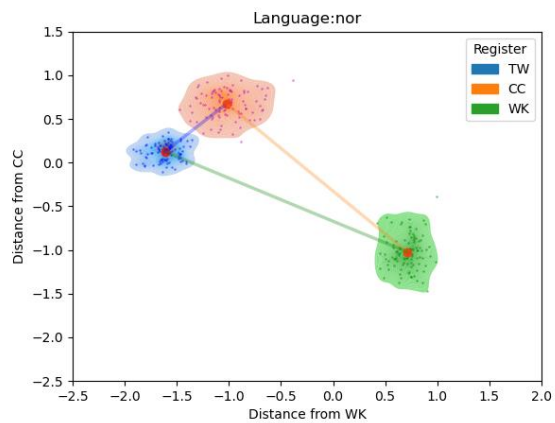

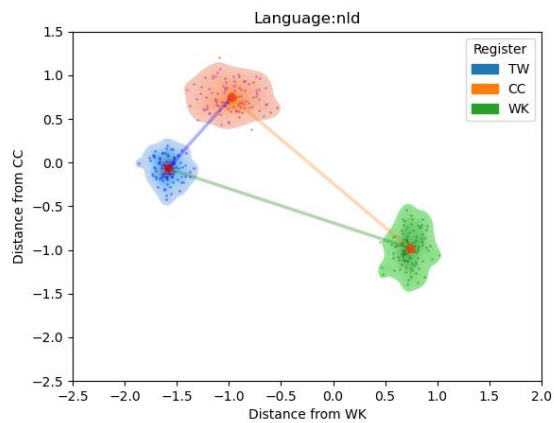

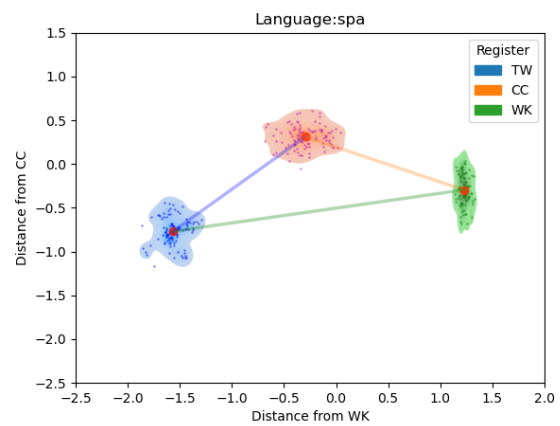

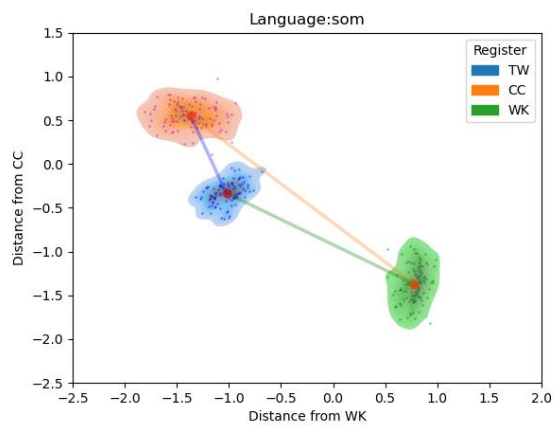

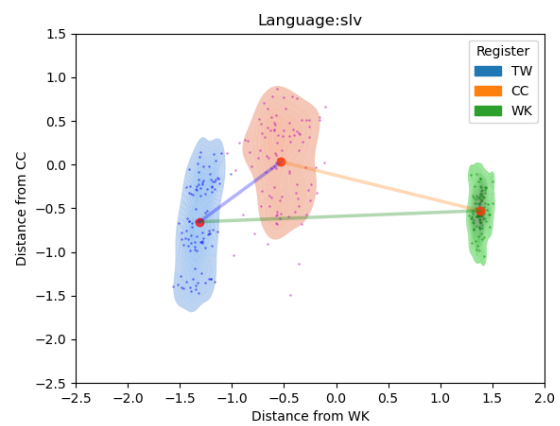

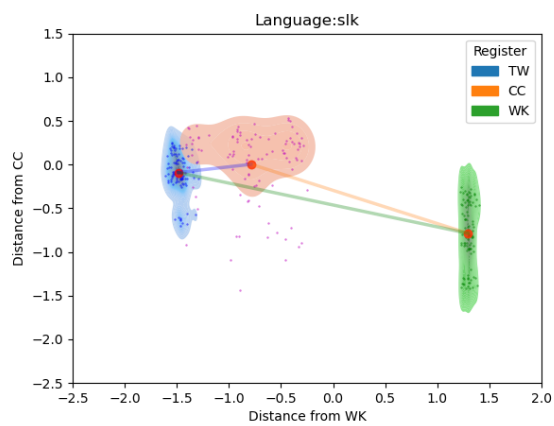

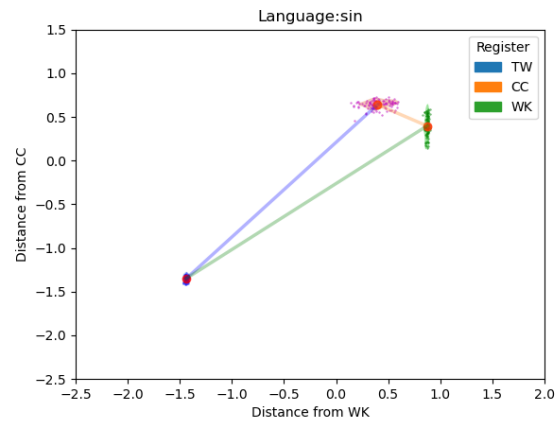

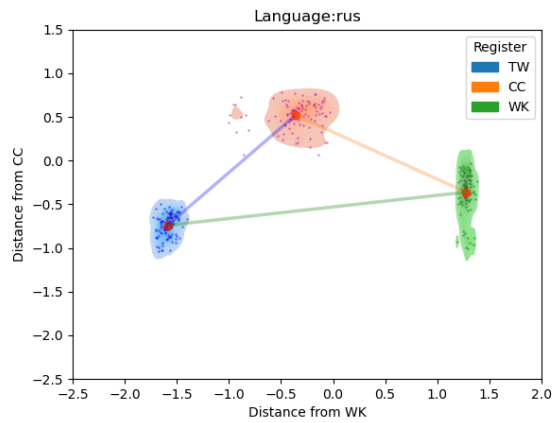

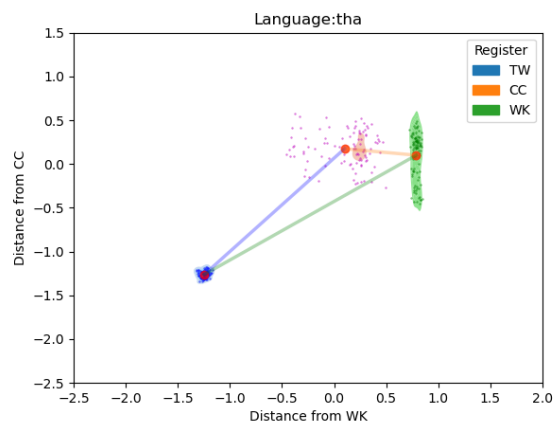

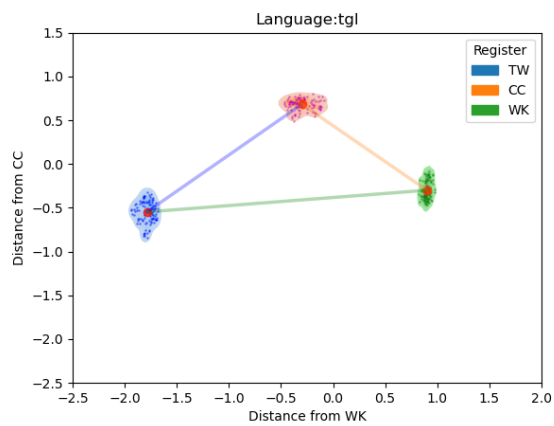

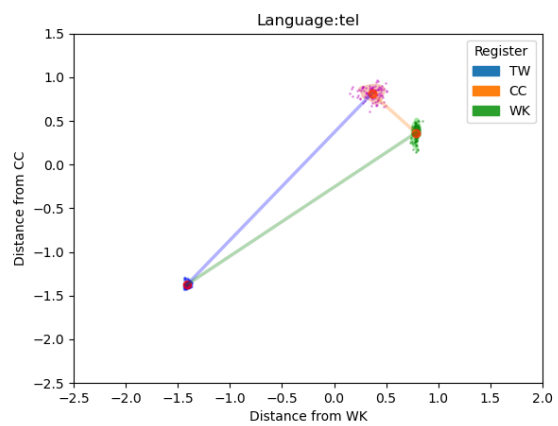

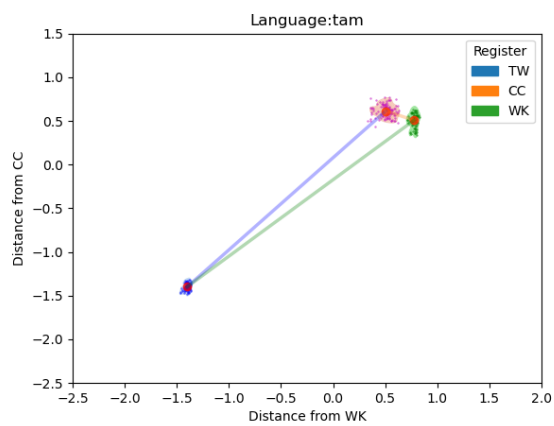

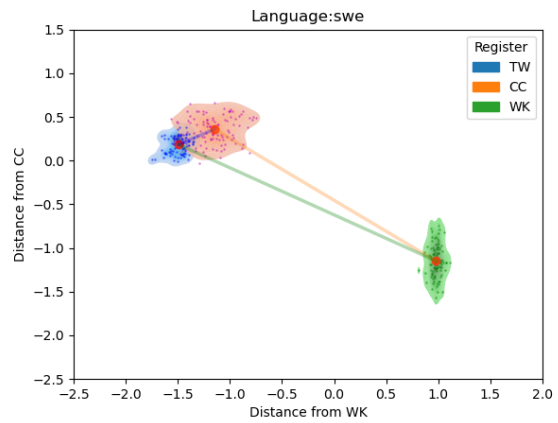

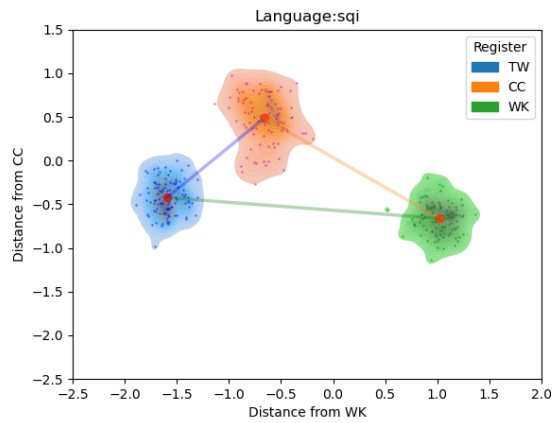

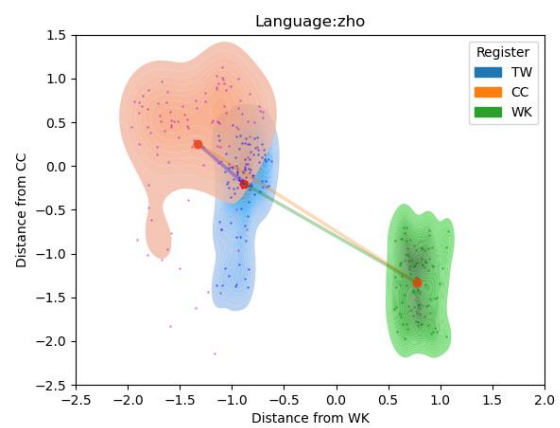

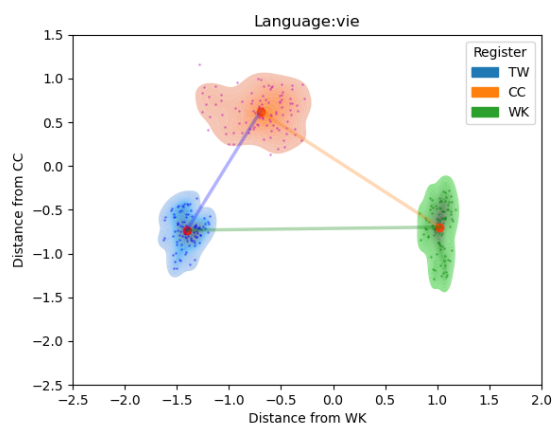

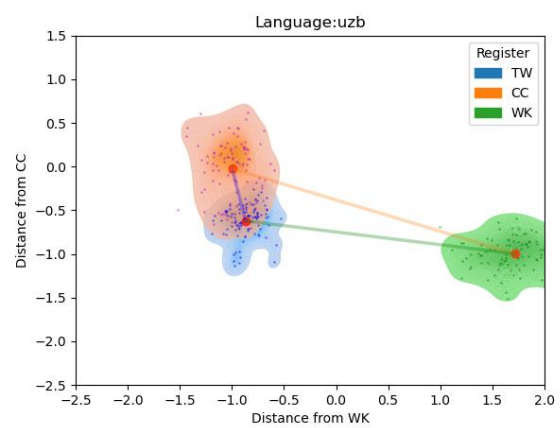

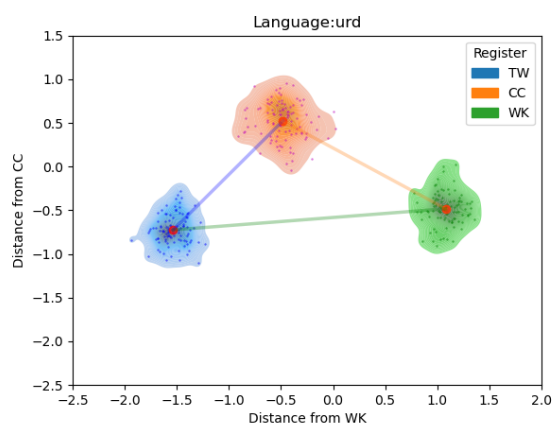

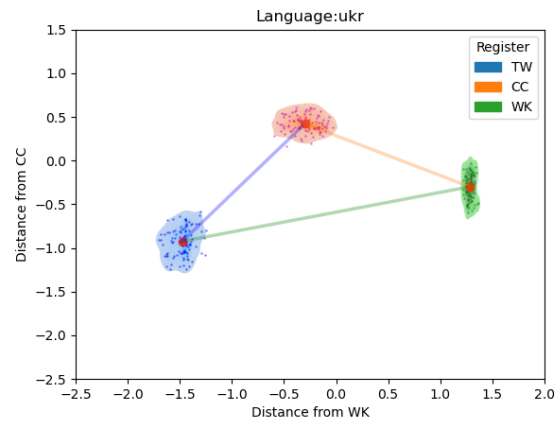

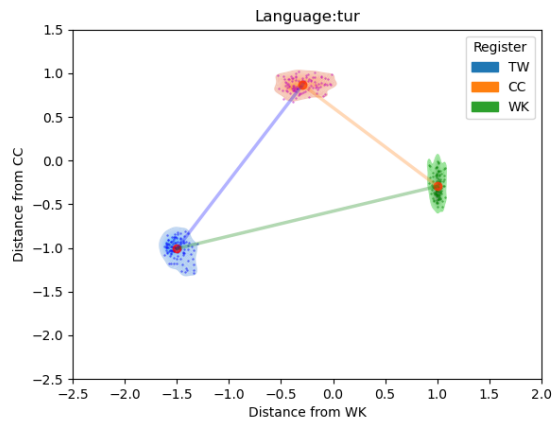

The similarity distance between registers for 60 languages are calculated based on the similarity networks displayed above and the distance values are listed in the table below. These distance values are used to generate the Figure 10 in the paper.

Table. Similarity distance between registers for 60 languages

Language	CC-TW	WK-TW	WK-CC	Language	CC-TW	WK-TW	WK-CC
